

# ESSENCE OF EVE DAY MED SPA — THE QUINTESSENCE OF SYNERGY

photography by aimee louise

## MINIMALLY-INVASIVE COSMETIC SURGERY IN A RELAXING, NURTURING ENVIRONMENT

*Working together with the end result greater than the sum total of the individual efforts. Essence of Eve Day Med Spa—the quintessence of synergy, whether weight reduction, facelifts, breast augmentation, laser skin resurfacing—many modalities marrying skills and surgery for patient results.*

### MEET DR. JOSEPH

Ralph Joseph, M.D., has dedicated his life to women's health issues as a board-certified OB-GYN and cosmetic surgeon. "Patients enjoy instant results of breast augmentation and tummy tuck, but I still enjoy helping God bring babies into the world."

Endometrial ablations, tubal ligations (Essures), LEEPS, breast augmentation, tumescent liposuction and tummy tucks are available by Dr. Joseph at the med spa. He also plans to relocate his practice to the spa in the fall.

### MEET DR. HO

Vu Ho, M.D., brings advanced cosmetic and reconstructive surgery and injectable expertise. A graduate of American Academy of Facial Plastic and Reconstructive Surgery fellowship at the University of Michigan, he has performed hundreds of minimally invasive facelifts and procedures. He also serves as an injectables instructor for a nationally known injectable product.

"Being exclusively devoted to facial aesthetic surgery I have a keen sense of artistic appreciation and experience for great results—a win/win for both me and the patient," Dr. Ho said. "Enhancing best features and targeting patient concerns, this minimally-invasive technique performed under local anesthesia allows patients to resume normal activities within four to six days."

### MEET SPA OWNER, DARLA REED JOSEPH

"Spas are not a thing of the past," she said. "Job market advantage, an instantly-gratified society, longer lives—all contribute to individuals searching for a single location to work with you regarding

weight, aging skin, skin issues, or stress issues; a place with integrity, honesty, as well as results. Whether male or female, age is not a factor—we've provided injections on patients as young as 27 and facelifts on patients 78 years young!"

Introducing in 2010: a protocol for HCG—assisting those who have tried everything and can't reduce their weight.

Definitely worth a visit—if not for surgery, for the massages, facials and nail treatments—all an experience. "This is our ministry," Darla said. "It's a blessing for us."
